

EMAIL VALIDATION

Code:

```
email = input("Enter your Email : ") # e.g., g@g.com
```

```
k, j, d = 0, 0, 0
```

```
if len(email) >= 6:
```

```
    if email[0].isalpha():
```

```
        if ("@" in email) and (email.count("@") == 1):
```

```
            if (email[-4] == ".") ^ (email[-3] == "."):
```

```
                for i in email:
```

```
                    if i.isspace():
```

```
                        k = 1
```

```
                    elif i.isalpha():
```

```
                        if i.isupper():
```

```
                            j = 1
```

```
                    elif i.isdigit():
```

```
                        pass
```

```
                    elif i == "_" or i == "." or i == "@":
```

```
                        pass
```

```
                else:
```

```
                    d = 1
```

```
            if k == 1 or j == 1 or d == 1:
```

```
                print("Wrong Email 5")
```

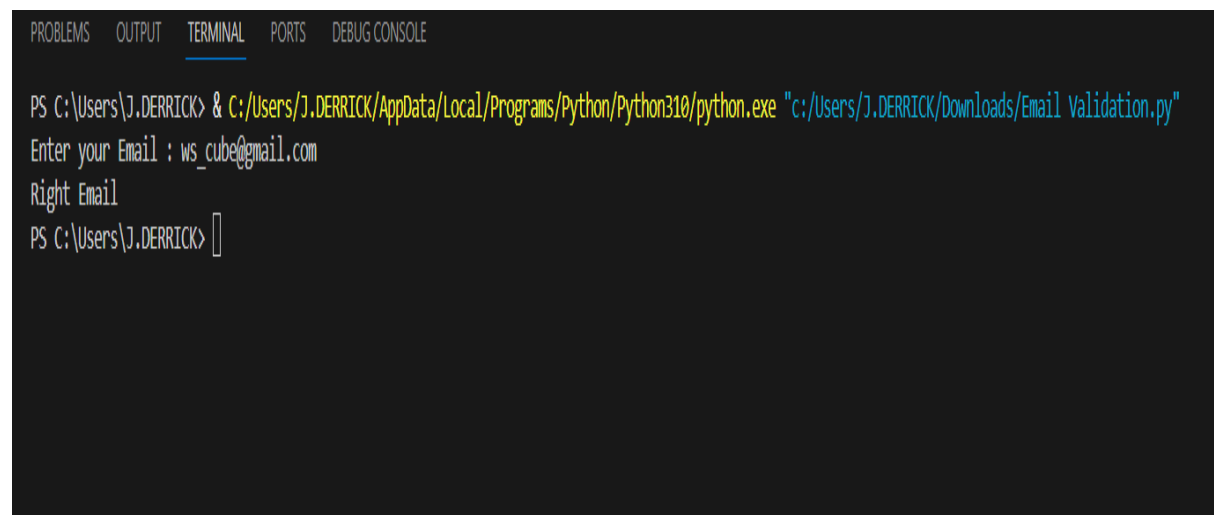

```
            else:
```

```
                print("Right Email")
```

```
        else:
```

```
        print("Wrong Email 4")
    else:
        print("Wrong Email 3")
    else:
        print("Wrong Email 2")
else:
    print("Wrong Email 1")
```
